Dear Dr Barry

On behalf of SGM as copyright holder I am happy to grant permission for the figure from "A Study of the Kinetics of Hyphal Extension and Branch Initiation of Fungal Mycelia" by A. P. J. Trinci which was published in Journal of General Microbiology 1974; 81: 225 - 236 to be reproduced, provided that the source is acknowledged.

For our records could you let us know which figure you are going to reproduce.

Yours sincerely

Kendra Waite

Subject: Copyright clearance

Dear Dr. Walker,

I apologise in advance if I am not addressing my query to the correct person.

I was advised by Copyright.com to contact SGM directly in order to seek clearance for the reproduction of an extract (a figure) from one of your publications in my PhD thesis. The publication in question is as follows:

A. P. J. Trinci, "A study of the kinetics of hyphal extension and branch initiation of fungal mycelia," J Gen Microbiol, vol. 81, no. 1, pp. 225-36, 1974, doi: 10.1099/00221287-81-1-225.

I would be grateful if you could assist me in this matter.

Regards,

David Barry.
